

Andrew Jordan

Senior Product Owner / Designer / Developer - Fintech & Blockchain

andrew@agbjordan.me · agbjordan.me · linkedin.com/in/andrew-jordan21

+66 (0)87 662 1942 · Bangkok, Thailand · British citizen - UK right to work · Remote, UK hours

Over 20 years taking **hard problems** and shipping **clean solutions**, mostly fintech, mostly Asia. I cover the full product loop: ownership, design, development, QA, and the decisions that connect them.

EXPERIENCE

Head of UX / Product Owner - Fraction Global · Bangkok

2022 – Present

- Sole designer and product owner behind Thailand's first SEC-regulated tokenized real-world-asset investment platform (Solana) - investor, issuer and admin products across web and mobile (Next.js, C#, Flutter).
- Designed a P2P chat-based secondary market for tokenized assets - Thailand's first, engineered within SEC, BOT and AMLO constraints, now in a 24-month SEC regulatory sandbox.
- Ran the founding discovery that defined the MVP and secured investor buy-in, contributing directly to a \$3M Series A.
- Conceived and shipped PayConnect, an AI-verified eKYC/eKYB onboarding platform: average onboarding cut from 10 to 3 business days, onboarding team from 4 people to 1, ~95% of submissions now complete on first compliance review.
- Own the backlog, sprint planning and release QA; created the brand identity and design system; contribute production front-end code and mentor the team.

Head of Design - Palo IT · Bangkok

2021 – 2022

- Coordinated design across 6 parallel feature teams in Bangkok, Hong Kong and Singapore to ship SCB TechX's Level Up loans app (iOS/Android) as one coherent product.
- Led an 8-designer practice across Bangkok and international offices, delivering digital banking transformation and government fintech engagements.
- Managed C-level client relationships at major Thai banks and government agencies; led pre-sales design consulting contributing to \$2M+ in new business.

Lead UX / Branding Designer - Seven Peaks Software · Bangkok

2018 – 2021

- Ran product discovery for pre-product Fraction through its seed rounds; led UX for dtac.co.th, Thailand's #2 telco.
- Designed the trading platform UI/UX for ERX, a Thai cryptocurrency exchange, including its retail mobile trading apps.

Head of Design - The Asia · Bangkok

2016 – 2018

Design Studio Manager - Liquid Branding · Bangkok

2012 – 2016

Senior Designer - Professional Image Marketing · UK

2003 – 2012

INDEPENDENT PRODUCT

Winga - winga.me · feature-flag consolidation SaaS

2025 – Present

- Designed, built and shipped solo - every product decision, line of code, QA pass and billing flow (Next.js, Firebase, Gemini, Stripe); in development, waitlist open.
- Import-first onboarding pulls existing flags from .env files, Vercel and GitHub Secrets; an AI codebase scanner surfaces shadow flags nobody remembers setting.

SKILLS

Product	Product owner / product manager · discovery & MVP definition · user research · roadmapping · sprint planning · stakeholder & regulator management (SEC, BOT)
Design	UX/UI · design systems · brand identity · prototyping · usability testing · Figma
